# & CONSTRUCTIVE ADVICE BUILDING SOLUTIONS

Whyte Construction is one of the leading construction companies in Canterbury and is well experienced and knowledgeable about all aspects of the city's rebuild. The solution-based company embraces the latest technologies, materials and building techniques and has dedicated teams with the relevant expertise to work on commercial and domestic building projects as well as re-builds fit-outs and renovations.

“We have an established and credible history as Licensed Building Practitioners and pride ourselves on building strong relationships with our clients,” says David Whyte.

It's vital for people to have confidence in their building practitioner and Whyte Construction is able to coordinate the entire process of repairing a property to building a new home including design and engineering, concept plans, council consents and ensuring all work is completed to exacting standards.

Whyte Construction also works closely with the major insurance companies on over-cap level residential repairs and rebuilds - homeowners in this situation have the right to nominate Whyte Construction as their preferred builder. The designs, plans and work are then managed within the financial envelope agreed between the particular insurance

company and the homeowner. Alternatively, a homeowner may choose to employ their own architect and use Whyte Construction for the build only.

“While many homeowners have been waiting a long time to get repairs carried out with their insurers, we are aware that many insurance companies are increasingly only offering a cash settlement rather than a repair or rebuild. Our advice is to be very informed about new codes of compliance and the potential for unforeseen repair or

building costs before you reach final agreement.

“If you have agreed to a cash settlement and are looking for a construction company to carry out the work we are more than happy to talk to you. Give us a call to see how we can help you.”

The company has an enviable reputation for its skill and experience in building on complex sites that require flexibility of design and construction. Because Whyte Construction can apply engineering and expert building advice, clients can be assured that their repair or new home will be robust and earthquake resistant.

Whyte Construction is located at 37 Leslie Hills Riccarton, phone (03) 348 0173 for further information email [info@whyteconstruction.co.nz](mailto:info@whyteconstruction.co.nz) or visit [www.whyteconstruction.co.nz](http://www.whyteconstruction.co.nz).
