

Fully guaranteed building service

“We have an established and credible history as licensed builders,” says Dave Whyte, Managing Director of Whyte Construction. “That’s extremely important for people to know when they’re selecting a builder for their project, especially at a time in Canterbury when some untested building practitioners are trying to take advantage of earthquake rebuild work. We, on the other hand, are known for our quality assurance. Our trade qualified team has over 500 years of combined experience in residential and commercial projects in New Zealand and around the world.”

Whyte Construction works across all sectors of the building industry, residential and commercial, repairs and new builds.

An added safeguard and reassurance for clients is the fact that Whyte Construction is a member of the Certified Builders’ Association. The company therefore offers a fully guaranteed building service on new commercial buildings and residential dwellings in both architectural and standard designs, ranging from a one-of-a-kind dream home through to multi-level and multi-unit complexes. “This ensures complete peace of mind for our clients – and in addition, new home owners are covered by the 10-year Homefirst Builders’ Guarantee of quality workmanship.”

Whyte Construction works across all sectors of the building industry, residential and commercial, repairs and new builds. The company is EQR-accredited for carrying out under-cap EQC level earthquake repairs to residential properties. Clients can request them as their preferred builders with Fletchers by nominating them to their local hub. Whyte Construction are also working with insurance companies on over-cap level residential repairs and new builds and these homeowners may nominate Whyte Construction as their preferred builder as well.

“We are also involved with a lot of buildings other than residential. A new bulk store and retail/office space in Culverden, repairs to a number of large manufacturing buildings, and repairs and reinstatement of a number of churches are just a few of our current projects.” Whyte Construction also offers house and land

packages. They have a number of architecturally-designed houses available at Pegasus Town – and a couple of them are right on the edge of the golf course. What more could a dedicated golfer ask for?

Whyte Construction offers a full design and build service, involving not only architectural designers, but engineering expertise as well, should this be required. “Bring any building issue to us and we will find a solution. We embrace the latest technologies, materials and building techniques. What we offer is quality at a very fair market price, while working with our clients to determine their needs and their budget.”

Whyte Construction are located at 37 Leslie Hills Drive, Riccarton. Phone 348 0173. Email info@whyteconstruction.co.nz. For more information visit www.whyteconstruction.co.nz.
