

# Fully guaranteed building service

Whyte Construction is one of the leading construction companies in Canterbury. It has been in operation for over 17 years and has earned an enviable reputation for consistent client satisfaction. What does this company offer that makes it successful and that ensures return business from many clients?

"We have an established, transparent and credible history as licensed builders," says Dave Whyte, Managing Director of Whyte Construction. "That is an extremely important criterion for people to know when they are selecting a builder for their project. Our trade qualified and Licenced Building Practitioner team has significant experience in residential and commercial projects in Christchurch and New Zealand."

An added safeguard and reassurance for clients is the fact that Whyte Construction is a member of the Certified Builders' Association. The company therefore offers a fully guaranteed building service on new residential

dwelling in both architectural and standard designs, ranging from a one of a kind dream home through to multi-level and multi-unit complexes. "This ensures complete peace of mind for our clients – and in addition, new home owners are covered by the 10-year Homefirst Builders' Guarantee of quality workmanship."

Whyte Construction offers a full design and build service, involving not only architectural designers, but engineering expertise as well, should this be required. "Bring any building issue to us and we will find a solution. We embrace the latest technologies, materials and building techniques." In this respect Whyte Construction are well-aware that the damage caused during the earthquakes by heavy claddings has triggered a change in focus towards features such as lightweight cladding and roofing with improved durability and seismic resistance.

They have a number of sections available at Pegasus Town that can be purchased as a section or they can work with you to design and build your new home. Several of these sections are on the edge of the Mapleham Golf course, a desirable location if you enjoy golfing. With Pegasus Town infrastructure moving ahead rapidly, now's the time to secure your piece of paradise.

Earthquake repairs are also a big part of their workload. Rick Jones, General Manager, notes, "Repairs and rebuilds in the hill suburbs and on TC3 land require a real depth of building knowledge. We have that and will work with clients on the best-fit materials for their repair or rebuild to ensure earthquake strength. We want clients to know that when

*"We want clients to know that when they build with us they will know the true cost of their project before work begins. What we offer is quality at a very fair market price, while working with our clients to determine their needs and their budget."*

they build with us they will know the true cost of their project before work begins. What we offer is quality at a very fair market price, while working with our clients to determine their needs and their budget."

Whyte Construction are located at 37 Leslie Hills Drive, Riccarton. Phone 348 0173. Email [info@whyteconstruction.co.nz](mailto:info@whyteconstruction.co.nz). For more information visit [www.whyteconstruction.co.nz](http://www.whyteconstruction.co.nz).
