A PERFECT EXAMPLE OF SYNERGY

When Whyte Construction undertakes new builds, renovations or repairs on earthquake damaged residential houses, they are very aware that clients have an emotional attachment with their homes and the neighbourhood they live in, and this forms an important part of the building process. Being back in their own homes with the comfort of knowing their home has been repaired or rebuilt to a high quality standard is important not only to the clients but also to Whyte Construction.

One of the business' most recent repair and upgrading projects on a Merivale property is a perfect example of the synergy between this empathetic building company and the owners. Whyte Construction's professional approach, keeping the clients informed and excellent organisational skills, has meant the owners have returned to their property and are simply delighted with the outcome.

It is Whyte Construction's many years of experience in the industry that give clients the real sense of confidence and reassurance. Regardless of the size or type of project Whyte Construction undertakes it will be carried out with the same high level of quality and service, they are renowned for. Understanding the need to be versatile across various aspects of the construction industry has also been at the heart of Whyte

Construction's longevity and success. If you are considering undertaking your repairs or wanting to rebuild your home, Contact Whyte construction today
